

## Workstation Setup

Use the following instructions to set up each workstation that will run the ADVANTAGE Software:

1. From the Start Menu, select Run and type:  
  
notepad c:\config.sys
2. Using Notepad, locate the line that says "FILES=" and confirm that the number that follows is equal to or greater than 100. If not, please change this line to:  
  
FILES=100  
  
If you do not locate the "FILE=" entry, please add the entry as it is shown above.
3. Do the same for the "BUFFERS=" entry, making sure that it is set to at least 50. Again, if this line does not exist, please add the following:  
  
BUFFERS=50
4. Save and close the config.sys file.
5. Create the following directory on the workstation:  
  
c:\advantag\tmpfiles
6. Copy the font file **C39hdw2.ttf** (AKA **BC C39to1HD wide**) from the server to the Windows Font File directory.
7. Reboot the workstation.
8. After rebooting the workstation, map a drive letter to the server share by issuing the following command:  
  
net use x: \\server name\advantag (x is the example of the drive letter)
9. Having followed these installation procedures, the Advantage Records Management program executable will be launched from the following location:  
  
x:\advantag\advantag.exe
